# REMVUE™ ELECTRIC

Emission Compliance | Engineered Solution | Easy Deployment

REMVue® Electric brings compressor control and process electrification into a single solution. Save time and effort during install, commissioning, and maintenance without needing to run between the electrical and compressor buildings. Access, configure, and troubleshoot your electric compression asset from one place, even remotely.

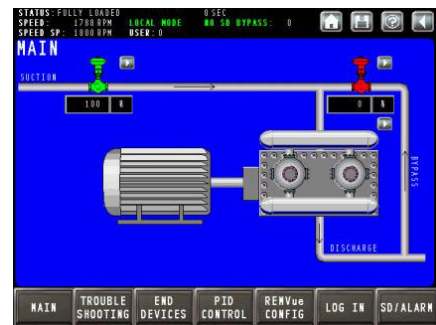

## COMPRESSOR CONTROL

### Engineered Solution

A solution built on 30+ years of compressor control IP and a worldwide installed base of Spartan control panels, variable frequency drives (VFDs), and motors.

### Complete Visibility

Eliminate guess work with an all in one system which provides complete visibility of the compressor, VFD, and motor all on a single HMI.

VFD overview screen

## PROCESS ELECTRIFICATION

### Zero Local NOx Emissions

Eliminate local NOx and meet your emissions compliance targets for the federal Multi-Sector Air Pollutant Regulations (MSAPR)

### Connected Compression

Remotely control your HMI, access your data, troubleshoot alarms and faults, and optimize your electric compression asset at your convenience.

### Easy Start-Up & Support

Simplify your commissioning, start-up, and maintenance with an integrated solution, proudly supported by Spartan's 24/7 service and support.
